

```
git config --global user.name "harshad"
```

```
git config --global user.email "harshadjagtap703@gmail.com"
```

```
cd /desktop/ITTA18
```

```
git init
```

Add stuff to file

```
git add .
```

```
git commit -m "Initial commit"
```

```
git remote add origin <repository_url>
```

```
git push -u origin master
```

```
git pull origin master
```

```
git branch <branch_name>
```

```
git checkout <branch_name>
```

```
git checkout -b <branch_name>
```

```
git branch
```

```
git branch -d <branch_name>
```

```
git merge <source_branch>
```
